DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 10/21/05, and has been entered and made of record. Currently, **claims 16-34** are pending.

Response to Arguments

2. Applicant's arguments, see pages 10-21, filed 10/21/05, with respect to the rejection of independent **claims 16, 22, 23, and 26** are rejected under 35 U.S.C. 102(e) as being anticipated by Misawa *et al.* (U.S. Patent Number 6,771,382) have been fully considered and are persuasive. Therefore, the rejection of independent claims 16, 22, 23, and 26 has been withdrawn. Similarly, the arguments regarding independent **claims 20 and 24**, which were rejected under 35 U.S.C. 103(a) as being unpatentable over Misawa *et al.* in view of Shoujima (U.S. Patent Number 5,754,778), and independent **claims 21 and 25**, which were rejected under 35 U.S.C. 103(a) as being unpatentable over Misawa *et al.* in view of Toyoda (U.S. Patent Number 5,812,278), have been fully considered and are likewise persuasive. Therefore, the rejections of independent claims 20, 21, 24, and 25 have also been withdrawn.

Allowable Subject Matter

3. **Claims 16-34** are allowed (renumbered as **claims 1-4, 6, 8, 10, 12, 14, 16, 18, 5, 7, 9, 11, 13, 15, 17, and 19, respectively**).
4. The following is an examiner's statement of reasons for allowance:

Regarding *claims 16, and 20-26 (renumbered claims 1, 6, 8, 10, 12, 14, 16, and 18, respectively)*, upon reconsideration, in the examiner's opinion, it would not have been obvious to a person of ordinary skill in the art at the time the invention was made to have the systems, as claimed, include the features of storing a limit capacity of a mail server that indicates the maximum data amount that the mail server can store for one e-mail transmission, and comparing the amount of the e-mail to which the converted data is attached with the limit capacity of the server. Upon review of the closest prior art, previously indicated as Misawa *et al.* (U.S. Patent Number 6,771,382), the examiner concedes that Misawa fails to particularly teach of storing a limit capacity of the mail server, with the limit capacity indicating a maximum data amount that the mail server can store for one e-mail transmission. Further, no other reference was found that teaches these features. Because of this, the claims are rendered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Yamamoto (U.S. Patent Application Publication 2004/0008373) discloses a e-mail receiving system that receives e-mail data deprived of an attachment due to a capacity limitation of a mail server.
